

## How to make Felt O-Rings in less than 5 minutes 😊

### Tools

- Hammer
- 1/4" and 3/8" Hollow Punch
- Cutting Board
- "A" Grade Felt
- Golf Tee
- Watch pin remover

### Step 1. Making the Felt O-Ring

Punch the larger hole first before punching the centre hole. It took me several attempts before I got the alignment right.

### Step 2. Inserting the Felt O-Ring into the Carb.

Use the golf tee to not only stop the O-Ring from falling through, but to help push the O-Ring into the groove.

Use the watch pin remover to poke the lip of the O-Ring into the groove.

Remove the tee and use the watch pin remover to poke the rest of the O-Ring into the groove.

Pop the tee back into the hole to firmly seat the O-Ring in place.
